

1RU Horizontal Cable Management Panel

Product Brief:

The 1RU Horizontal Cable Management Panel is a professional and efficient solution for managing cables in a rack or cabinet. The panel is designed to fit into a standard 19-inch rack or cabinet and features a horizontal layout for organising and routing cables. The panel includes metal slots for securing cables and maintaining proper bend radius, ensuring optimal performance and reliability.

Features:

- **Efficient Cable Management:** The horizontal layout of the cable management panel allows for efficient and organized routing of cables, reducing clutter and improving the appearance of the rack or cabinet.
- **High-Quality Material:** The cable management panel is durable and resistant to wear and tear, ensuring long-lasting performance.
- **Easy Installation:** The panel is designed to fit into a standard 19-inch rack or cabinet.
- **Cable Protection:** The metal slots in the panel help to maintain the proper bend radius of cables, protecting them from damage and improving overall network performance.
- **Cable Capacity:** The panel can accommodate up to 24 cables, providing ample space for cable management needs.
